Professor João Almeida e Daniel Ferreira

ClassManager

> is a system to manage the distribution of schedules for teachers, classrooms, and students.

Evolution of our system

Room	Class	Time	Professor
Class: 4.2.1	IA P3	Time: 14h	Professor: Júao
Class: 4.2.8	IA P2	Time: 9h	Professor: Tiago
Class: Anv 5	SIO T1	Time: 11h	Professor: Margarida
Class: Anv 4	IA T1	Time: 15h	Professor: Tojal
Class: 4.2.10	FP P1	Time: 17h	Professor: Almeida
Class: 4.1.5	SO P4	Time: 10h	Professor: Barreira
Class: 4.3.8	RS 08	Time: 11h	Professor: Bagagem
Class: 4.1.108	AED P1	Time: 13h	Professor: Almeida

Manual processes and knowledge are concentrated in just a few people

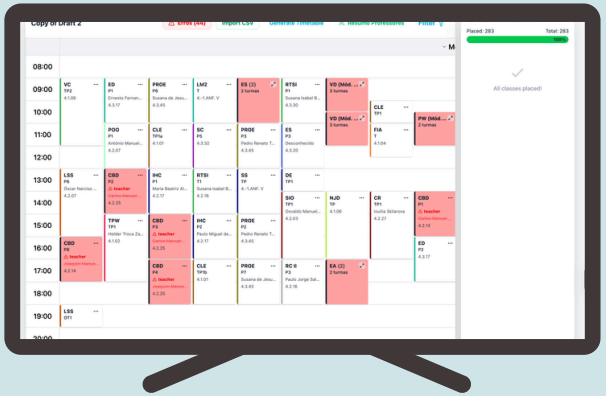

The system doesn't consider students' or teachers' preferences

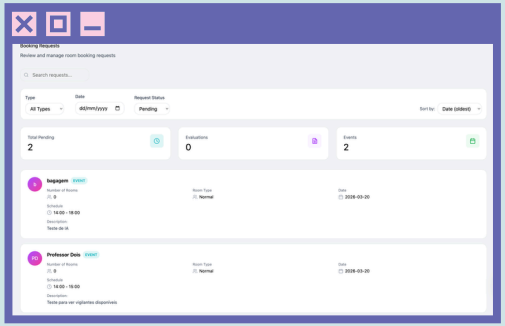

Slow and error-prone adaptation to schedule or room changes

Schedules are inefficient and classrooms are often overcrowded or underused

Actors

Consult schedules and room assignments

Student

Secretary

Handle classroom booking requests.

Validate schedules and request rooms

Teacher

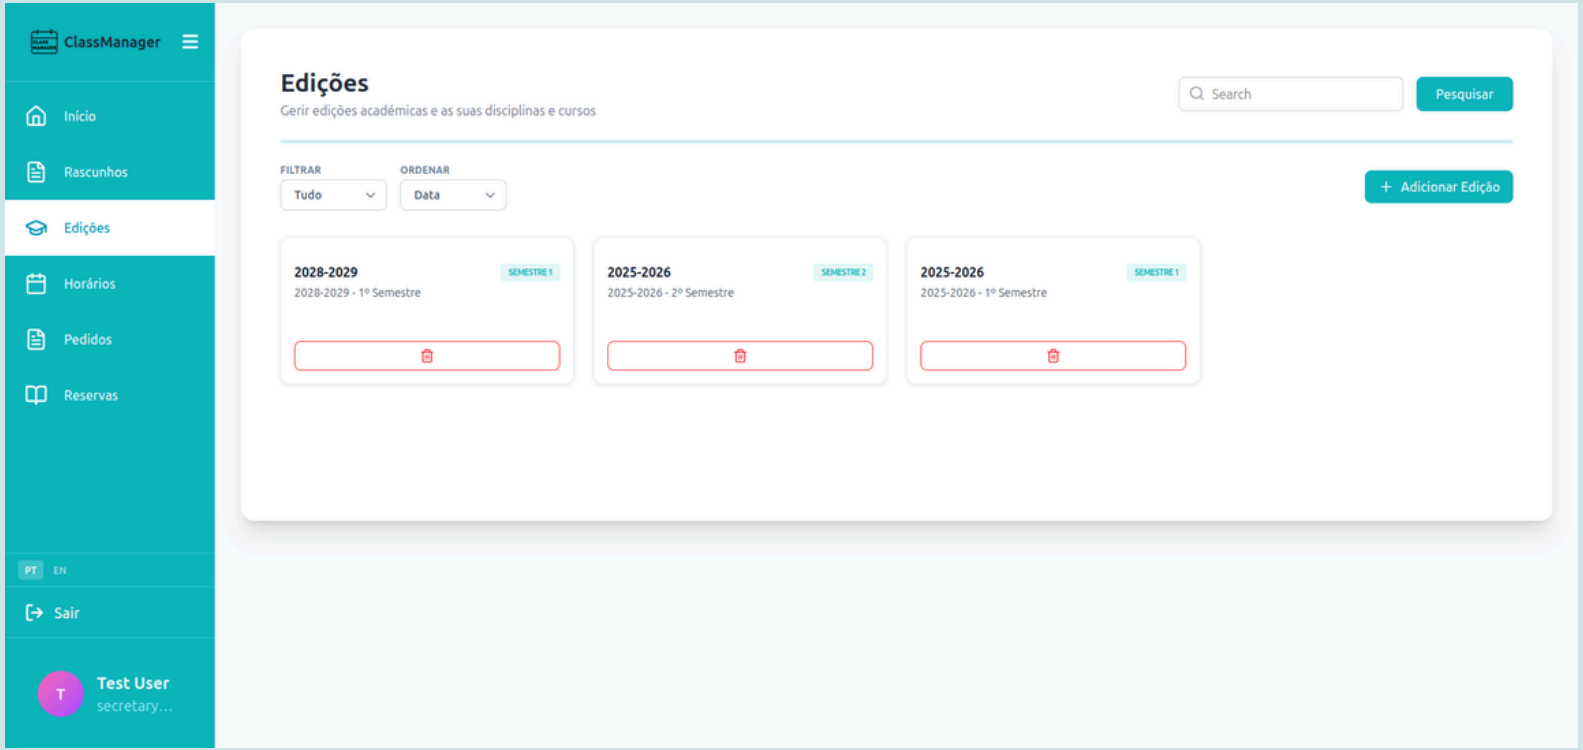

Admin

Oversee scheduling and system management

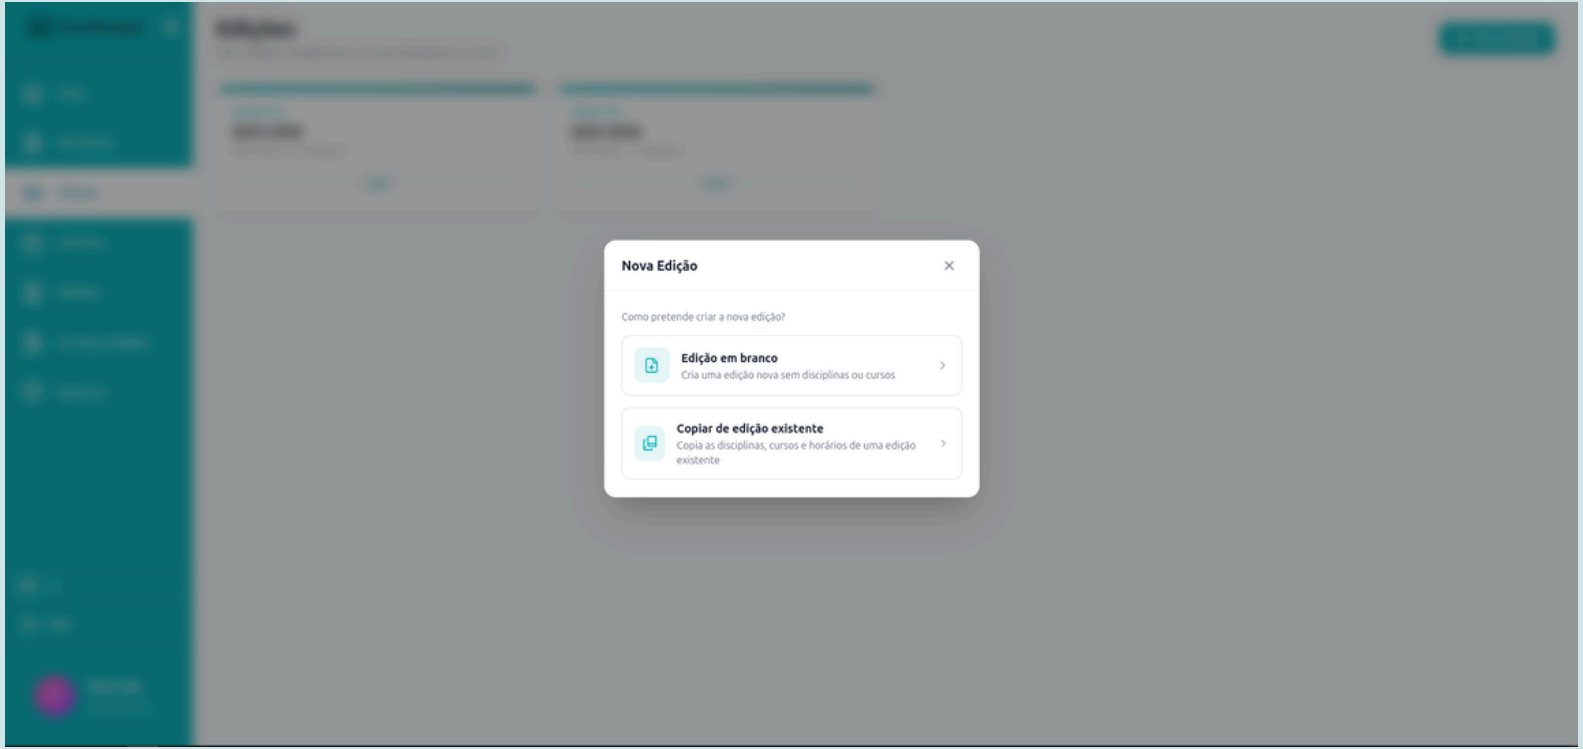

User Story 1

System Usability Scale

79/100

- Create a New Edition
- Add New Subjects and Classes
- Plan a New Schedule
- Resolve Shedule Conflicts

90/100

- Search for a Teacher Schedule
- Make a Room Request
- Manage Room Requests

92.5/100

- Check the Schedule for a Room

Improvements made based on feedback

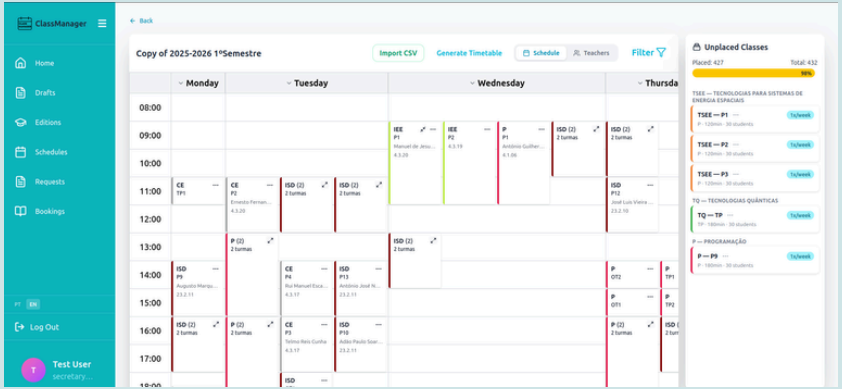

System Status Visibility and Error Prevention

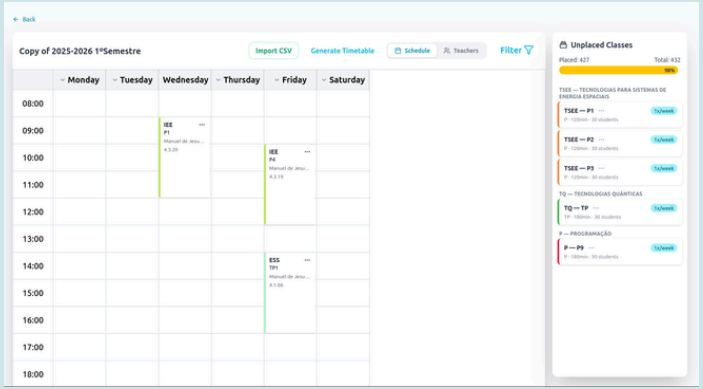

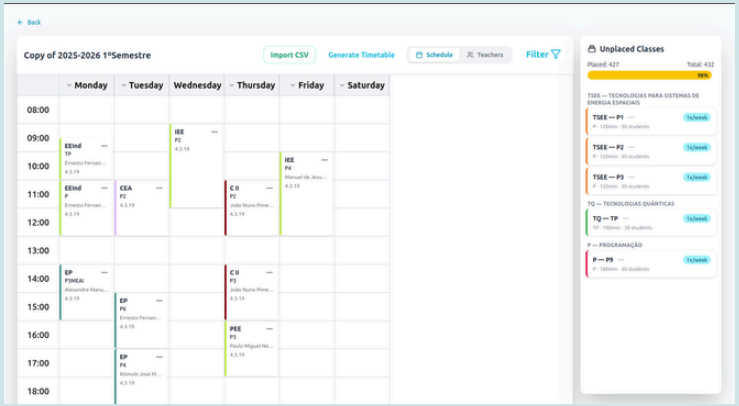

Recognition rather than Recall

Planned improvements

Project Calendar

Modules	Date	Tasks List
Schedule Improvements	12/03 to 24/03	1. ~~Improvements based on feedback (12/03-15/03)~~ 2. Implement suggestions from tests (12/03-22/03) 3. Simultaneous Views (17/03-24/03)
Core System Improvements Module	25/03 to 14/04	1. Observability (25/03-28/03) 2. Cache Implementation (25/03-02/04) 3. Algorithm Enhancements (02/04-14/04)
Legal requirements, technical and business risks.	15/04 to 03/05	1. Analysis university rules 2. Terms of service 3. Identify bussiness risks 4. Acceptence tests 5. User guide

We are here

New Tasks

Project Calendar

Modules	Date	Tasks List
System component validation (performance,scalability, testing, security)	06/05 to 19/05	1. Adding log system 2. Implementing a backup system 3. Defining Database migration strategy
Students@deti	20/05 to 26/05	1. Demo 2. Poster
Project presentation	26/05 to 02/06	1. Presentation

Thank you!
